DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

During a flood of the Colorado River in 1938 an older bridge at Regency, Texas, was destroyed. Mills and San Saba counties combined their efforts to build a new bridge across the deep ravines of the Colorado River at Regency. Bids for construction were advertised by both counties with the Austin Bridge Company of Dallas, Texas receiving the contract. Both counties agreed to supply lumber for use in building the flooring.

Construction began in February 1939 with excavation of the banks of the river. Six to eight feet of earth were removed so that footings for the towers could be poured. After the concrete and steel towers were built, a falsework was constructed across the Colorado River to support beams and trusses while cable was strung above them. This falsework washed away during high water on the Colorado River, but it was rebuilt and construction resumed.

The cables consisted of 475 strands of No. 9 galvanized wire and each cable passed over towers at both ends of the bridge. Both of the cables were anchored at each end by pouring concrete into excavated holes and placing the ends of the cable into it. Beams and trusses were connected to the cable by vertical one-inch turnbuckles. Eventually the cable and abutments held all the weight of the bridge plus vehicular traffic passing over it.

The Regency Suspension Bridge spans 340 feet from tower to tower. Both cables are pulled tight for another 134 feet behind each tower where they are anchored into the ground. The towers rise approximately 30 feet above the bridge floor. Maximum sag in the cable was not to exceed 7 feet above the floor of the bridge. The bridge stands 1.25 feet above the recorded high water level of the Colorado River at Regency. The flooring for the bridge was constructed with 4 by 12 inch lengths of lumber.

All work on the Regency Suspension Bridge was with hand labor and light-weight equipment. Local residents were used for common labor and worked 60 hours a week. Those individuals who were not local residents boarded at the nearby Regency Store.

Construction on the bridge was completed in October 1939. The bridge has maintained its structural integrity since that time with a minimum amount of maintenance. Today it is in need of painting and floor repair, but it remains sound and should continue to serve the surrounding area.

SPECIFIC DATES February - October 1939 BUILDER/ARCHITECT Austin Bridge Co., Dallas, TX

STATEMENT OF SIGNIFICANCE

Built for the counties of Mills and San Saba by the Austin Bridge Company of Dallas, Texas, the Regency Suspension Bridge is one of the last remaining suspension bridges in use in Texas. Although it does not meet the National Register of Historic Places age requirement, extenuating circumstances make its nomination necessary. It is likely that the bridge will be destroyed within a short period of time.

In 1938 after a flood along the Colorado River destroyed the older, heavily used bridge at Regency, Texas, a suspension bridge was erected in 1939 to reopen the transportation link between San Saba and Brownwood. Cotton and other agricultural products were shipped to market along this route. This bridge also provided an accessible crossing of the Colorado River for persons living in this locale.

Since its construction the Regency Suspension Bridge has maintained its structural integrity with a minimum amount of maintenance. Although today it needs painting and floor repair, the structure remains sound and should continue to serve its surrounding agricultural area.

National Register of Historic Places Department of Interior National Park Service 18th & C Street, N. W. Washington, D. C. 20240

Gentlemen:

The Commissioners Court, in their regular meeting August 9, unanimously voted to oppose any and all nominations of the Regency Bridge to any form of Historical Place.

We already have a historical monument classification of our Jail. As such we are forbidden to alter it in any form. So the Court feels that to place the Regency Bridge into such classification would interfere with the County's need for maximum use of the bridge.

Hence, the Court offers vigorous opposition to this plan for San Saba County.

Sincerely,

Jim Baker County Judge

JB:nrb

cc: Judge Herbert S. Faulkner Goldthwaite, Texas 76844

THE NATIONAL REGISTER OF HISTORIC PLACES

HERBERT FAULKNER

MILLS COUNTY JUDGE

AND

EX-OFFICIO COUNTY SUPERINTENDENT

GOLDTHWAITE, TEXAS 76844

September 17, 1976

National Register of Historic Places Department of Interior National Park Service 18th & C Street, N. W. Washington, D. C. 20240

Dear Sir:

The Mills County Commissioners Court on September 13, 1976, in their regular meeting, unanimously voted to oppose any attempt to place the Regency Bridge (in the West part of Mills County) on the Federal Register.

Since the Bridge is owned jointly by Mills and San Saba Counties and the bridge is still in use and saves miles of travel by using it. Also it does need some repairs on it now and then.

Therefore, the Court does go on record as opposing the bridge being placed on the Federal Register.

Sincerely,

Herbert Faulkner
Mills County Judge

HF/fg

cc: Judge Jim Baker San Saba County Judge San Saba, Texas 76877

> Mrs. M. F. Horton Chairman, Mills County Historical Commission Rt. 2, Box 107 Goldthwaite, Texas 76844

Therefore, the Court less to on record as office in the bridge being place on the Feleral nerieter.

Tance the laider is cancercointly by Hills and Jan Saba Counties on the rice is still in use and saves wiles of travel by using it, also it loss need fore repairs

1070, in chair remist mention, unrul ously retained to oppose any absorbt to fine the Remark language (in the Most Part of Lills County) or the Pederal Register.

Mr. Jim Baker County Judge San Saba, Texas 76877

Dear Mr. Baker:

OCT 15 1976

MUS 6, TX.

Thank you for your letter concerning the nomination of the Regency Suspension Bridge in Mills and San Saha Counties, Texas, to the National Register of Historic Places. By clarifying a few points, we hope to alleviate your concerns that listing in the National Register will automatically prohibit any alterations that the county might wish to make on the bridge.

Listing in the National Register is Federal recognition that a property has historic value and is worthy of preservation. Once listed in the National Register, a property receives limited protection from federally controlled, licensed, or funded projects and can qualify for either development or acquisition grants-in-aid. Listing has no other affect on the property. It does not restrict the range of actions an owner can take as long as Federal monies are not used, and it gives no governmental unit any authority or control over the property. Some State and local authorities utilize National Register listing as a basis for State and locally enforced restrictions. These State and local provisions providing for the protection of historic properties function independently from the National Register program.

In this case, National Register listing alone could not prohibit the county from altering or even demolishing the bridge, if Federal funds were not involved. The San Saba County Jail, which you mention in your letter, is not listed in the National Register. It was designated a Recorded Texas Historic Landmark in 1969. As such, it receives limited protection under a State statute which requires that a 90-day notice be given to the Texas Historical Committee before any action is undertaken which will alter or destroy the property's historic or architectural value. In no way does the statute prevent alteration or demolition of the jail or any other recorded landmark; it simply has a delaying effect.

Because of its county ownership, the Regency Suspension Bridge would come under the provisions of the Texas Antiquities Code if recognized as an historic property by the Antiquities Committee. In this case, the use of the National Register listing as recognition that a structure has

historic value, would be a State or local action. In addition, it is possible that the bridge would be recognized as a historic property by the Antiquities Committee without National Register listing. It is important to note that if the procedures of the Texas Antiquities Code apply to the Regency Suspension Bridge, a permit for alteration or development might be approved if plans were sensitive to those elements giving the bridge its historic value.

Finally, it is the responsibility of the National Register to consider only comments concerning a property's historical significance during the professional review process. We will be happy to review any comments you may have concerning the bridge's historical significance under the criteria explained in the enclosed leaflet.

We hope that this information will be helpful. We will be happy to answer any further questions you may have.

Sincerely yours,

(Sgd.) William J. Murtagh

Mr. Jim Baker County Judge San Saba, Texas 76877

Dear Mr. Baker:

Thank you for your letter concerning the proposed listing of the Regency Suspension Bridge, Mills County, Texas, in the National Register of Historic Places.

Listing in the National Register is Federal recognition that a property possesses historic values and is worthy of preservation. Inclusion of a property in the National Register ensures the Advisory Council on Historic Preservation an opportunity to review and comment upon any federally controlled, licensed, or funded undertaking which may affect the property. In addition, preservation projects for National Register properties, in accordance with an approved State historic preservation plan, can qualify either development or acquisition grants-in-aid. Listing has no other effect on the property; it does not affect in any manner, the range of actions an owner could take, as long as Federal monies are not involved; and it gives no governmental unit any authority or control over the property, its use, or disposition.

Under section 60.13(a) of 36 CFR part 60, notice has been published in the September 14, 1976, "Federal Register" for comment on the pending nomination of the Regency Suspension Bridge for inclusion in the National Register. Any written comments received concerning the significance of the property under the National Register criteria for evaluation, set forth in the enclosed leaflet, will be carefully considered during the professional review process. Copies of these written comments will be supplied to the State Historic Preservation Officer.

We hope this information will be useful to you.

Sincerely yours,

William J. Murtagh Keeper of the National Register

Mr. Herbert Faulkner Mills County Judge Goldthwaite, Texas 76844

Dear Mr. Faulkner:

Thank you for your letter concerning the nomination of the Regency Suspension Bridge in Mills and San Saba Counties, Texas, to the National Register of Historic Places. By clarifying a few points, we hope to alleviate your apparent concerns that listing in the National Register will automatically restrict the use of the bridge and will prohibit either county from making any alterations or improvements.

Listing in the National Register is Federal recognition that a property has historic value and is worthy of preservation. Once listed in the National Register, a property receives limited protection from federally controlled, licensed, or funded projects and can qualify for either development or acquisition grants-in-aid. Listing does not restrict the range of actions an owner can take as long as Federal monies are not used, and gives no governmental unit any authority or control over the property. National Register listing alone could not restrict use of the bridge or prohibit improvements.

Some State and local authorities use National Register listing as a basis for State and locally enforced restrictions. These State and local provisions protecting historic properties function independently from the National Register program. For example, because its county ownership, the Regency Suspension Bridge might come under the provisions of the Texas Antiquities Code which prohibits the demolition or alteration of any publically owned, recognized historic property without a permit from the Texas Antiquities Committee. If the Committee chooses to use the National Register listing as evidence that the bridge is a historic property, this use would be a State and not a Federal action. In addition, it is possible that the Committee might regard the bridge as a historic property independent of National Register action. Finally, it is important to note that if the procedures of the Code do apply to the bridge, a permit for alteration or development might be approved if plans were sensitive to the characteristics giving the bridge its historic value.

We hope that this information will be helpful. We will be happy to answer any questions you may have.

Sincerely yours, Ronald M. Greenberg
